

## SMART PARKING SOLUTION

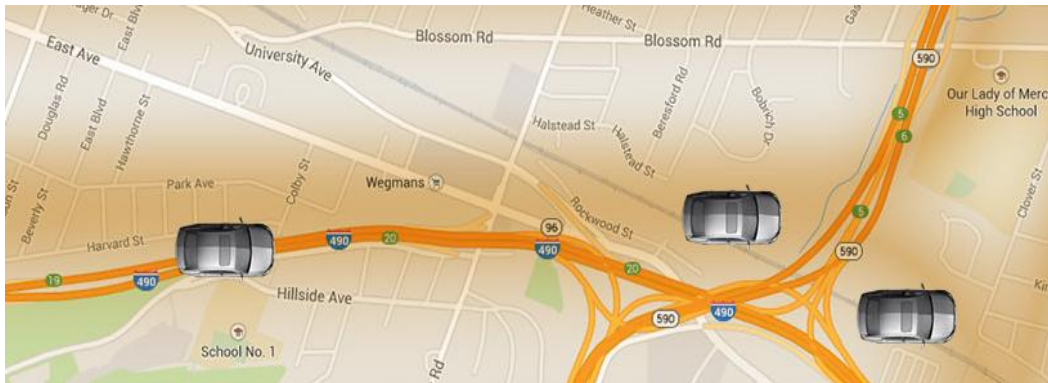

## CURRENT SCENARIO

Finding a parking space is always an hassle. there is no way of knowing if or not a parking spot is available, due to which lot of time is wasted while searching for a spot.

No information available of nearest parking place and available spot.

Where nearest parking ?

## CURRENT CHALLENGES

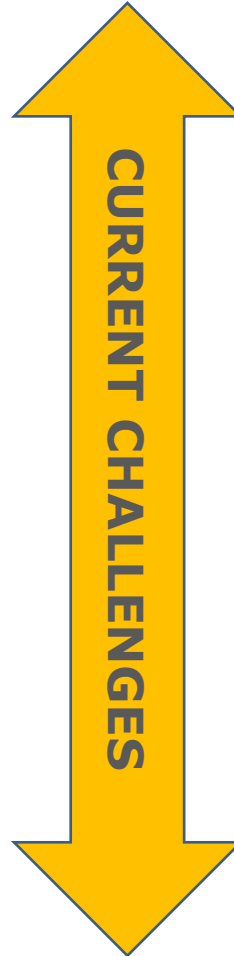

**Lack of sufficient parking space**

**On-street parking**

**Vehicles exceeds from the number of heads per family**

**Parking on special occasions**

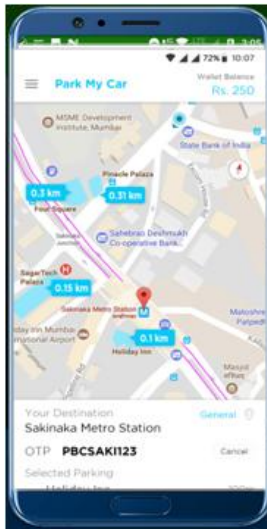

**Parked on streets in residential areas**

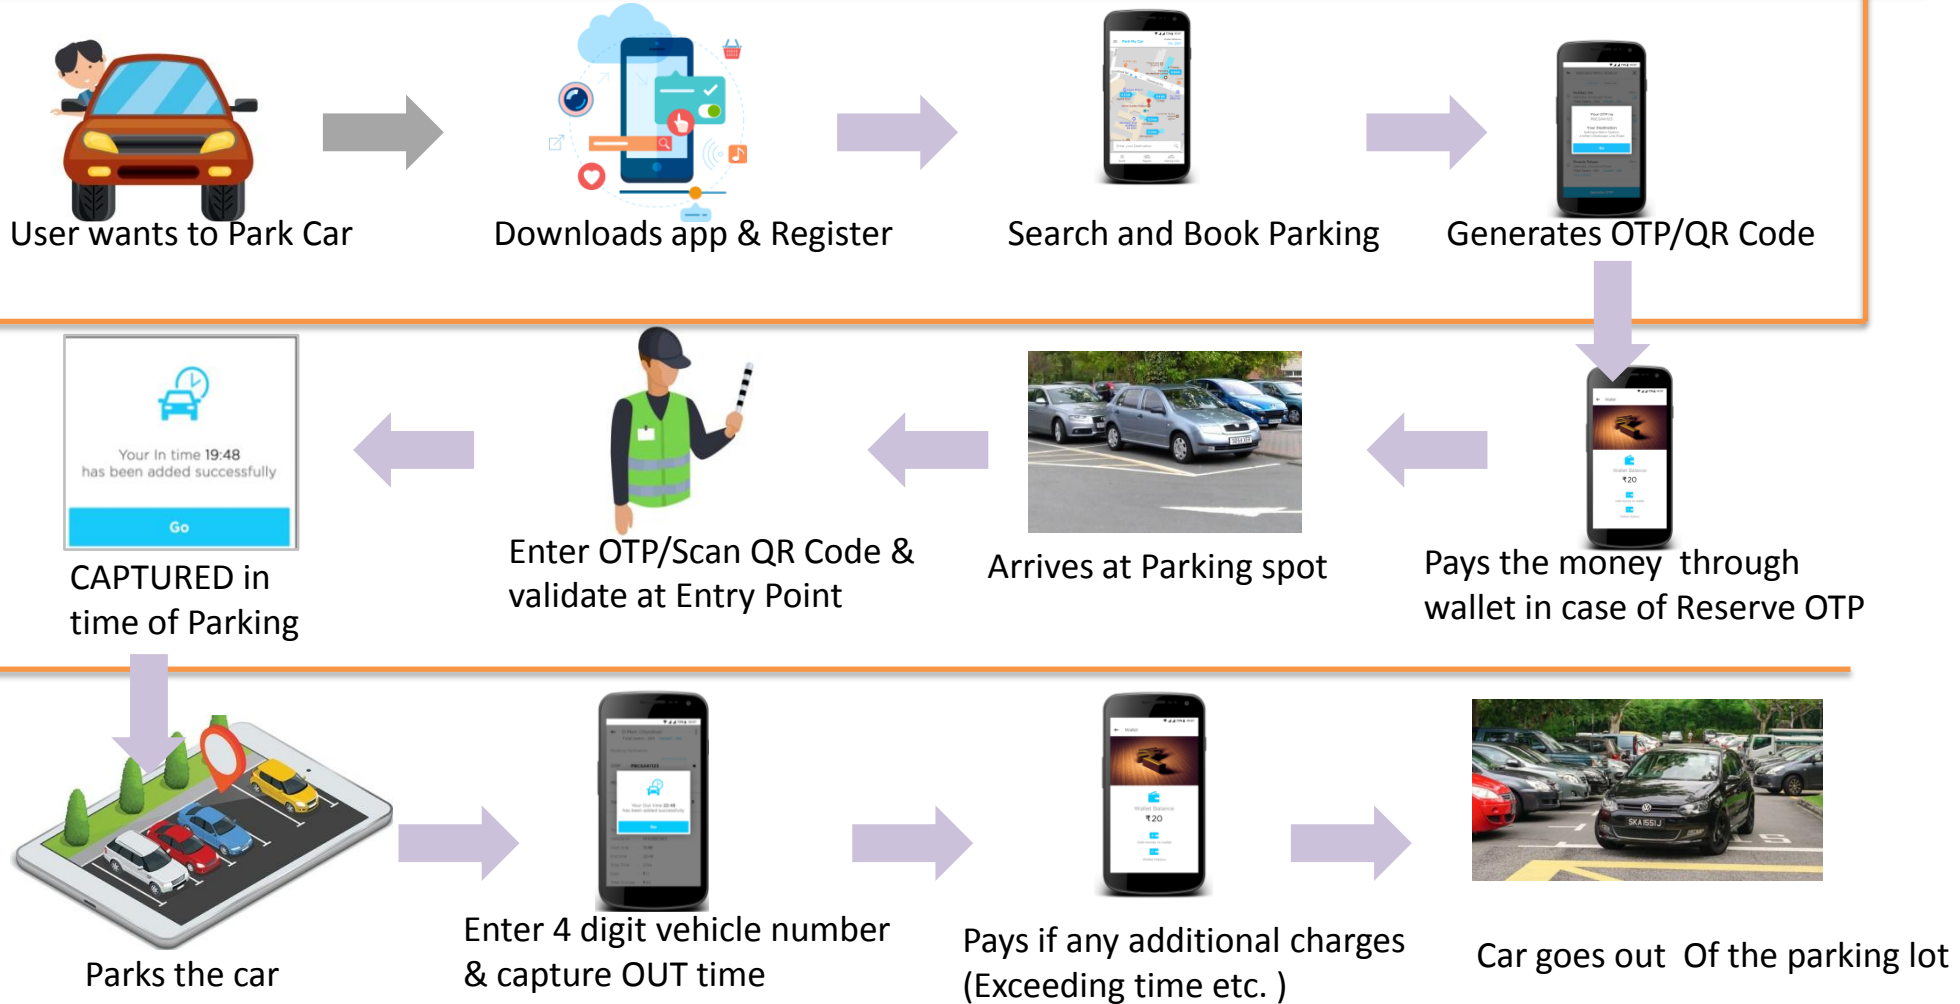

## OUR SMART PARKING SOLUTION

Hassle free and smarter way to park your vehicle without finding a parking space. “SMART PARKING SOLUTION” allows you to find a parking lot near you. you can see the no. of parking spots available and you use map to get the route and direction for the parking spot. the app also allows user to pre book a parking space, the user can pay for the booking space through payment gateway or he can also make an on spot payment. With a time based charge calculation user pays for the hours he used the parking space.
